

Parents and Students:

GISD Campuses are diligently working on a remote learning plan. Our teachers and staff are on Spring Break and we are working from distant places to ensure we have a successful digital learning launch next week .

Early next week, GISD staff will finalize digital learning plans, along with instructional materials, digital access information, etc. needed for your student(s).

For Elementary students, there will be a distribution of chromebooks, along with all necessary instructional resources, books, etc. on or about Wed, March 25th. Elementary students will be distributed a chromebook setup for remote learning and materials needed. More information regarding distribution will be announced early next week. Our goal is to begin digital instruction on Thursday 3/26/20.

For Secondary, all students have their chromebooks and remote learning opportunities will be communicated to parents and students. Our goal is to have instructional materials ready to present in a digital platform by Thursday 3/26/20.

GISD is in a unique position, as we have many new technological advances to assist us in this process. Please be patient as we collaborate with our teachers on Monday to provide the best remote learning plan for your child.

**

Additionally, we are working to provide meals for students during the time school is shut down. More information will be forthcoming on the specifics related to the meal program.
